

## ***Data Center Environmental Permitting and Compliance Challenges***

**Wednesday, May 26<sup>th</sup>, 1:00 pm – 5:00pm Pacific**

The Pacific Northwest's cheap power, open spaces, and tech-savvy populations provide an opportune habitat for the location of large data centers that power and run the world's key web industries. New data centers are in planning and development as the demand for storage and online services grow. Environmental permitting of these facilities brings new challenges to industry and regulators alike. The A&WMA Puget Sound Chapter presents an online workshop focused on data center environmental permitting and compliance.

**Webinar Workshop hosted by:**

**[Puget Sound Chapter of the Air & Waste Management Association](#) and [SLR Consulting](#)**
